EDUCATION

Kalinga Institute of Industrial Technology

Bachelor of Technology in Computer Science

Bhubaneswar, Odisha

Aug. 2023 – May 2027

Salt Lake School

Primary to Higher Secondary

Kolkata, West Bengal

Aug. 2008 – March 2023

PROJECTS

Customer Operations Analytics Dashboard | *Python, Pandas, Streamlit*

Nov. 2025 – Dec. 2025

- Built analytics pipeline on 20K+ support tickets to extract operational insights and KPIs.
- Cleaned and structured raw customer data into analysis-ready datasets.
- Analyzed ticket priorities, issue categories, and customer segments.
- Enabled decision-making through structured KPI reporting.

Sales Performance Analytics | *Python, SQL, Power BI*

Feb. 2026 – Mar. 2026

- Developed sales analytics system to track revenue and performance trends.
- Designed KPIs for incentives, segmentation, and performance tracking.
- Processed and analyzed data using SQL and Python.
- Built dashboards for business insights and optimization.

Document Scanner (Computer Vision) | *Python, OpenCV, NumPy*

Mar. 2026

- Built a document scanning system using image processing techniques.
- Applied edge detection and contour extraction for document boundary detection.
- Implemented perspective transform for clean scanned output.
- Improved usability by automating document extraction workflow.

Process Optimization and Workflow Analytics | *Python, SQL, Power BI*

Mar. 2026 – Present

- Analyzed workflows to identify bottlenecks and inefficiencies.
- Built structured datasets for operational analysis.
- Improved resource allocation using data-driven insights.
- Created dashboards for monitoring performance metrics.

TECHNICAL SKILLS

Languages: Java, Python, C/C++, SQL, Shell Script, YAML

Frameworks: Pandas, NumPy, Streamlit, OpenCV, Power BI, Jupyter Notebook, Git

Tools: Power BI, Excel, Git, Linux, Vim, VS Code, Jupyter Notebook

Libraries: pandas, NumPy, Matplotlib, Scikit-learn, OpenCV
